PROFESSIONAL SUMMARY

Frontend Developer with 2.6 years of experience building scalable, high-performance web applications using React.js and Next.js. Delivered 3 production applications serving real users, with expertise in state management (Redux), REST API integration, SSR/SSG optimization, and reusable component architecture. Proven ability to collaborate crossfunctionally, resolve complex frontend issues, and translate Figma designs into pixel-perfect UI - consistently shipping clean, maintainable code.

TECHNICAL SKILLS

Skills: JavaScript, TypeScript, React, Next.js, Redux, REST API, GenAI Integration, HTML5, CSS3, SCSS, LESS, Tailwind CSS, Material UI, Bootstrap, Wix Velo, Git

PROFESSIONAL EXPERIENCE

Frontend Developer

Nov 2025 - Present

Mayora Infotech

Ahmedabad, Gujarat

- Built and maintained 3 production web applications - Studio App, Mayora Website, and Monitor Admin Panel - using React.js, Next.js, and Tailwind CSS.
- Resolved 15+ critical frontend bugs related to API integration and UI functionality, improving overall application stability and user experience.
- Partnered with backend developers to integrate REST APIs across 5+ modules, ensuring reliable data flow and efficient state management in frontend components.

Web Developer

Oct 2024 - Aug 2025

Mayu Technologies

Mohali, Chandigarh

- Developed fully responsive pages for 3 client projects - Pearl Academy, UPES Academy, and Backlinks - using Wix Velo and JavaScript, reducing page layout issues by ~40%.
- Engineered database-driven repeaters, custom collections, and dynamic dataset bindings to enable real-time content updates across 10+ content records.
- Integrated 5+ third-party REST APIs and implemented client-side and server-side form validation, ensuring secure and reliable data submission.

React Developer

Dec 2022 - Jun 2024

Nextpage IT Solution Pvt Ltd

Mohali, Chandigarh

- Developed and maintained 10+ core modules for Currys Cares, U Code, and 360-Linked App using React.js and Next.js, supporting thousands of active users.
- Implemented Server-Side Rendering (SSR) with Next.js, improving initial page load performance by ~35% across key application routes.
- Translated Figma screens into pixel-perfect, responsive UI components - including steppers, data tables, pagination, modals, and reusable custom hooks.
